## Information Security Policy

PetroData Management Services Limited (PMSL) was established to pioneer data storage and management as a data bank for the upstream and downstream sector of Oil and Gas industry in Nigeria and West Africa.

Petrodata have put in place an Information Security Management System in order to ensure the confidentiality, integrity and availability of all processing services, both internal and external.

Petrodata considers Information Security aspects as a top priority for customer confidence and the protection of the brand. The scope of the Information Security Management System is Motorways Centre Block "B" Ground Floor, 1, Motorways Avenue, Alausa, Ikeja, Lagos.

In all areas of operations, Petrodata is committed to ensuring all information is handled in a secure manner. Petrodata Ltd is committed to preserving the confidentiality, integrity and availability of all the physical and electronic information assets throughout the organization, in order to preserve its assets, legal, regulatory as well as contractual, compliance and image.

Petrodata is committed to providing service according to client's expectations, ensuring that we take all aspects of Information Security in delivering our services to our clients.

It is the policy of Petrodata to commit and maintain an Information Security Management System designed to meet the requirements of ISO27001:2013 in pursuit of its primary objectives.

In order to drive continual improvement within the Information Security Management System, Petrodata set objectives on an annual basis as part of the Management Review Process; these objectives ensure the system is appropriately monitored and measured. All objectives are communicated to all staff and include key responsibilities, timescales and appropriate measures of success.

### It is our Policy to ensure that:

- All information and systems will be protected against unauthorized access and disclosure
- Confidentiality of information will be maintained
- Integrity of information is protected from unauthorized modification
- Regulatory and legislative requirements will be met
- Business continuity plans will be maintained and tested (as far as practicable)
- All suspected breaches of information security will be reported and investigated

- Adequate prevention and detection of malware is in place
- Information Security Policies are in place to ensure the safe practice of using our computer and information systems
- We identify through appropriate risk assessment, the value of information assets in order to understand their vulnerabilities and the threats that may expose them to risk and to managing such risks appropriately
- Appropriate training will be provided for all employees
- Our Information Security Management System is maintained by a schedule of Internal audits carried out by competent internal auditors

By implementing the Information Security Management System in Petrodata we ensure compliance with ISO 27001:2013 Information Security Management Systems.

This policy is available to all internal and external interested parties upon request.
